

App\Entity>Status\addTicket

App\Entity>Status\remove
Ticket

setStatus

```
graph LR; A[App\Entity>Status\addTicket] --> C[setStatus]; B[App\Entity>Status\removeTicket] --> C;
```

The diagram illustrates a dependency or relationship between three methods. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'App\Entity>Status\addTicket'. The bottom box contains the text 'App\Entity>Status\removeTicket' on two lines. On the right, there is a gray rectangular box with a black border containing the text 'setStatus'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both 'addTicket' and 'removeTicket' methods depend on or call the 'setStatus' method.
